

## Mini-Grants for Climate Change Education

*Climate Solutions for Alabama* invites applications for Educator Mini-Grants of up to \$250 to support student learning about rapid, human-caused global warming and climate change. Grants can support *grades 7-12* classroom activities and materials, independent student projects, teacher-student-community collaboration, and/or other initiatives approved by the CSforA board of directors.

*We welcome proposals at any time:* To apply, please submit a letter of interest including the following:

- A statement of proposed goal(s) and outcome(s)
- A description in appropriate detail of project focus/content, process, timeline (through end date), and specific expenses needing grant support
- Initiatives may address climate change causes, impacts, mitigation and/or adaptation—but **MUST** include student attention to climate solutions at one or more levels (e.g., individual, community, business, institutional, government)
- Identification of other resources, if any, to be applied to the project
- Letters of support from proposed partners or collaborators, if any
- Commitment to provide an outcomes report (including student feedback) within one month of project completion
- Signatures of teacher applicant and school principal

CSforA will award grants once a month from available funding, beginning in January, 2022. To submit, report, or query: [climatesolutionsforal@gmail.com](mailto:climatesolutionsforal@gmail.com)
